

Learning Quest 1: Hola Mexico

In this quest we have explored Mexico as a country, its rich history and its fantastic art and music.

In history we discovered how the Maya people lived and worked, how they farmed their land and created a number system and hieroglyphs to communicate with. We looked at how their society developed and linked it with the development of the Anglo-Saxons which also share a similar period in history.

In art and design we designed and created our own day of the dead masks and compared and contrasted some different Mexican artists.

In Music we looked at different type of Mexican songs, comparing and contrasting them and using our musical vocabulary to describe features such as pitch, and tempo.

THE TROSNANT TIMES YEAR 6 AUTUMN CELEBRATION EDITION!

The year 6 children have begun their learning journey showing a great determination to be successful. Using resources and support, the children are making links within their learning. They have shown true resilience.

In English, the children have produced engaging writing for a range of genres. These have been linked to our class text 'Holes'.

In maths, the children have developed their confidence in all four operations and have begun exploring fractions.

Thank you for your support with home learning and reading. The home learning has hooked the children into the learning quest topics.

Next term we will begin our new topic 'Darwin's Delights' looking at his theory of evolution and how animals have adapted to the world we live in today.

Learning Quest 2: Frozen Kingdoms.

This quest has been centred around Geography.

We have looked closely at the polar regions, their features and locations. We explored the Arctic and Antarctic and their similarities and differences, creating fact files about the two regions including facts such as human and physical features and the way that people survive in those extreme environments

In computing, we have become travel writers! Our focus has been on how to search effectively for information, learning how google ranks its searches based on user input and then researched the polar regions ready to create our very own travel blog about visiting the polar regions.

In art and design we have looked at polar art and how watercolours can be blended to create stunning backdrops for our collage of polar art animals.
